

SciTrends

Be part of the future.

What is SciTrends?

SciTrends is a Web Video Series that covers the cutting edge of science and technology, as well as the people behind the research. By following the latest trends, SciTrends sheds light on the careers that forge the tools of tomorrow.

Our episodes can be found on YouTube and our site: SciTrends.org.

Join our conversations on Facebook and Twitter: @SciTrends, where we share the latest news in science and technology, as well as videos and blogs by students, teachers, and scientists about their adventures in STEM.

Share your stories.

Are you interested in science and tech? Join the SciTrends community by **becoming a Student Ambassador**. SciTrends Ambassadors share their interests in STEM.

Do you code or make levels for video games? Interested in drones? Or maybe you like tinkering, taking stuff apart and putting it back together. Whatever you're into, if it's science and tech related, share your story with us.

Shoot a quick video, write about your experiments, or take a picture of what you're doing and send it our way! We'd love to see what you do and share it with our growing community.

Either shoot us an email at scitrends@gmail.com or post on your favorite social media platform using the hashtag "#SciTrends."
