

## Live Remote Skills at Live Remote VEX Worlds

### Introduction

At Live Remote VEX Robotics World Championship 2021, students will showcase their knowledge and skills in designing, building, repairing, and programming a robot, as well as documenting their learning in an engineering notebook and explaining their design process in a live interview. This event celebrates what students have achieved in this challenging season.

Teams will be able to sign up for time slots at [LRS Scheduling](#) beginning on Monday, May 3. This link will remain active for teams until Monday, May 10. Teams will rank the best time slots for which they can complete their skills matches. Teams will be assigned time slots to the best of our ability, based upon their responses in this form. Teams that don't complete the form (and don't let us know their schedule preferences for LRS) will be assigned to timeslots as best we can accommodate them. Here are the basics of how Live Remote Skills will work during the event:

- Teams will get assigned a 1 hour block in which they will be able to run up to 6 (3 Programming, 3 Driver) skills matches of 1:00 each. There will be 12 dedicated Referee Scorekeepers available for scheduled teams.
- If teams miss their assigned 1 hour block, they will be able to join a first come-first served queue at any time during the event. Only 4 Referee Scorekeepers will be assigned to handle the first come-first served teams at a time.
- The final two hours of skills will be completely first come-first served to accommodate emergencies and other unforeseen circumstances.
- Joining the first come-first served queue will not guarantee that teams will get all 6 skills runs, but we think that this model provides the most flexibility to deal with otherwise difficult schedules.

### Procedure

At their scheduled time slot, teams will login at [Console.liveremoteskills.org](https://Console.liveremoteskills.org) and enter the queue. Only teams that have officially registered and paid will be able to login to the LRS Console, and only those teams that have passed inspection will be able to enter the queue to run a match. A referee scorekeeper will then invite that team to join a meeting room where the team will begin their skills runs. After each run, teams will go back to the lobby and then let the referee scorekeepers know that they are ready for their next run by entering the queue once again. This process repeats until their hour is up, or they have completed all 6 of their runs.

**Congratulations to all teams on your successes this season, and good luck at VEX Robotics Live Remote World Championship!**

**Scheduled Times for VRC & VIQC LRS**
